Food Vlogs Webpage using HTML and CSS(Basic)

-By Joy deb

# Certificate on HTML5 and Bootstrap

Introduction

This project is mainly based upon HTML , Bootstrap and a some CSS.The Project name is Food Blogs where their is a search box at the top to search food to know about their recipies and details and then we have some of the recent Post where you will find some of the food item listed with their Images and Description about the food.Then you will see an about us section below that recent post section where you will get some info about the company and then you can also tell about yourself section on that.

1.

Introduction about the webpages and their is search box tool where you can find the food using food name and food code

2.

Here you will find some food items name and their desciption which are made in row and column with sample photo attacted with them

Rajma Chawal

Rajma chawal is kidney beans served with boiled rice. Some of the best Rajma is said to be grown in the north Indian state of Himachal Pradesh, Uttarakhand

Mutter Panner

Mutter means peas, and paneer is a solid cottage cheese, so this mutter paneer dish combines the two in a rich tomato-based gravy with a touch of cream.

Aloo Parantha

Looking a lot like a pancake, aaloo paratha is actually a flatbread stuffed with a richly seasoned mashed potato.

vegetarian kabab is so much more satisfying. In Indian cuisine, kababs are a wide variety of grilled meat, some that are mixtures of ground meat and seasonings.

Masala Chai

There's nothing like the experience of stopping at a chaiwala on an Indian street and ordering a steaming cup of masala chai. The beverage has gained worldwide

Samosas

Samosas are a very popular traditional Indian Dish. Probably because samosas are a tasty, fried, or baked pastry with savory fillings.

Lassi's

Lassi's are yogurt-based drinks made with water, spices, and sometimes fruit. Mango or cardamom-flavored lassis are some of the most popular
